Sinar 6095 AgriPro Portable Moisture Analyzer

- Extremely easy to use
- Rugged, portable design
- No grinding necessary
- Clear digital readout
- In-built averaging facility
- Precalibrated for 19 crops
- Automatic temp compensation
- Complete with carry case

Sinar AgriPro Moisture Analyser - Accurate Results in Seconds

Sinar Technology have been manufacturing moisture meters in the UK for over 25 years. Our instruments have become a byword for accuracy, being used by professional farmers and merchants around the World.

All this experience has gone into designing the Sinar AgriPro whole grain moisture meter, the ideal tool for checking the moisture of your cereals, pulses or oilseeds wherever you need to measure moisture.

The Sinar AgriPro is extremely easy to use - simply pour the grain into the measurement cell, screw down the compression lid and read off the moisture content from the backlit digital display.

Technical Specification:

Order Code:	6095-001AG
Moisture range:	5% - 45% dependant upon application
Operating Temp. range:	0 - 45 deg. C
Readout resolution:	0.1% moisture
Principle of operation:	Capacitance
Temperature comp:	Automatic
Size:	21 x 7.5 x 7.5cm
Weight inc. carry case:	1.5Kg
Battery:	9v Alkaline
Accuracy:	Better than +/-0.5%mc dependant upon application
