

SINAR TECHNOLOGY

Sinar Agri Check NIR Moisture, Protein and Nitrogen Analyser

- NIR (Near Infra Red) technology allows analysis of Moisture, Protein (in wheat) and Nitrogen (in barley)
- Easy to use – simply fill and test.
- Store and retrieve data for thousands of samples, gives you full audit traceability.

Product Description

Using the latest in NIR (Near Infra Red) technology the Agri Check provides an affordable solution for measuring Protein, Nitrogen & Moisture on-farm or at intake. This makes the Agri Check the ideal instrument for Farmers looking to precisely measure and manage all aspects of their grain as well as traditional grain labs and intake points.

The Agri Check features an easy to use graphic interface and with minimal sample preparation even an inexperienced user can take accurate measurements in minutes.

The Agri Check's internal hard drive has the capacity for thousands of results which can be archived and retrieved through the large touch screen. Results can then be sent to a printer or stored on a separate data base.

Product Features

Measurement modes: Moisture, Protein (Wheat), Nitrogen (Barley)
Measurement Principal: NIR (Near Infra Red)
Dimensions: 45x45x40 cm (approx)
Weight: 22 kg

Supplier Address

Sinar Technology Unit 6,
The Metro Centre,
Toutley Road,
Wokingham, Berkshire
RG41 1QW UK
